

YMCA Camp Hi-Rock

In 2022, YMCA Thessaloniki proudly announced the relaunch of its program for sending Greek youth to American summer camps, a program that has provided many Greek children with unforgettable life experiences in the past. This program remains a significant milestone in their youth.

The program is open to boys and girls aged 10 to 16, offering them the chance to experience the American outdoors through a variety of activities, connect with peers from other countries, and learn about a different way of life. The camp is set in a country where the camping tradition has evolved beyond just summer fun, emphasizing entertainment, socialization, and the creation of strong human bonds.

Participants will engage in numerous camping activities, both outdoors and in water, practice their English, explore new places and people across the Atlantic, visit cities and American universities, and understand the international scope and capabilities of YMCA.

This revival of the program represents a continuation of YMCA Thessaloniki 's century-long tradition of innovative camping programs.

With YMCA Thessaloniki 's expertise and its long-standing collaboration with American YMCAs, the program promises another unique opportunity for children and young people that will stay with them for a lifetime.

Join us for a unique experience in the United States and become a member of the global YMCA family!
